Dr. LEE Chu Kee, Angel

Dr. CHENG Ho Yu

Dr. NGAI Fei Wan, Vivian

Ms. LO Yim Ping, Sally

#### Hon. Advisor

Prof. LOKE Yuen Jean Tak, Alice

# Message from the President Dr. LI Ho Cheung William

I am profoundly honoured and privileged to have been elected as President of the Hong Kong College of Education and Research in Nursing (HKCERN) from 2021 to 2024. I wish to express my heartfelt

gratitude to past presidents, including Professor Frances Wong and Professor Alice Loke, for building a strong foundation for the College. Specifically, I would like to convey my sincere appreciation to my immediate predecessor, Professor Loke. During her six years as president immeasurably (2015-2021),Professor Loke expanded the College's horizons through her promotion of nursing education and research. I would also like to take this opportunity to thank all of the College's former council members, who have shown enormous commitment to achieving our mission over the years. Last but not least, I am delighted to welcome our new council members on board. This smooth transition fully embodies the spirit of inheriting the past whilst looking ahead to the future.

One of the objectives of HKCERN is to promote the advancement of nursing education and research in Hong Kong. Since the College's establishment in 2012, its members have been committed to raising standards for education and research in various nursing specialties.

In the coming years, we will continue to pursue excellence by strengthening our membership base and inviting more nurse educators, researchers and practitioners to join the College as members or fellows. I am excited to share with you that 111 fellows and seven ordinary members renewed their memberships in March 2021—approximately 5% more than last year. Another encouragement to note is that in June and July 2021, 27 educators and researchers from various tertiary institutions attended admission interviews for ordinary membership. As of 30 June 2021, 24 of these applicants had been accepted as ordinary members, with only three applications left to review in late July 2021. I wish to thank the council members who so tirelessly supported these membership promotion activities and swiftly vetted the applicants' qualifications.

#### The way forward

We fully understand that the College still has a long way to go. Far from resting on our laurels, we will continue to organise high-quality continuing education activities to meet the learning needs of the nursing community. Most importantly, we will continue to demonstrate our full commitment to realising the vision of the Hong Kong Academy of Nursing (HKAN): to strive for excellence in achieving safe and high-quality health care, benchmarked against international standards, by promoting advanced nursing practice. HKCERN will work hand in hand with the other colleges under HKAN to facilitate the implementation of the Voluntary Scheme on Advanced and Specialised Nursing Practice. This will pave the way for the establishment of a statutory registration system in Hong Kong to promote the professional development of advanced and specialist nurse practitioners. I am confident that, together with HKAN, we will cross new frontiers in nursing education and research in the future.

# **Activities and Highlights**

# The HKCERN 8th Annual General Meeting cum scientific programme [27 February 2021]

The 8th annual general meeting cum scientific programme was successfully held via Zoom on 27 February 2021. More than 60 HKCERN members and members from other institutions joined. We were pleased to be able to invite Prof. Agnes Tiwari and Prof. Frances Wong to share with us their knowledge on the theme 'Nurturing and developing the next generations of educators and researchers.' The new president, Prof. William Li, was inaugurated along with 17 council members. Congratulations!

# **HKCERN Council Meetings & Retreat** [8 May 2021]

New council members held a half-day retreat to discuss the way forward for HKCERN.

# **Briefing Sessions for Membership Application**

[*May 2021; July 2021*]

With the new pathway of HKAN, HKCERN conducted briefing sessions for membership applications, explaining the pathway and timeline for interested colleagues practising in education and research.

## 1st International Advanced Practice Nursing Conference (IAPNC) 2021

[22-23 May 2021]

Prof. William Li, Prof. Ka Ming Chow and Dr. Sally WS Lo attended the 1st IAPNC 2021.

# **Professional Developments**

#### Online Article to Obtain CNE Point

Starting from 2021, HKAN will be offering an online learning activity with CNE accreditation. Interested members can refer to the information provided on <a href="https://www.hkan.hk/main/en/on-line-articles-to-grant-cne">https://www.hkan.hk/main/en/on-line-articles-to-grant-cne</a>.

# 11th International Continuing Nursing (ICN) Nurse Practitioner (NP)/Advanced Practice Nursing (APN) Network Conference

Registration is now open for the 11th ICN NP/APN Network Conference, which will be held virtually on 29 August–1 September 2021. Approval for awarding ICN Education Credits is currently being sought from the International Council of Nurses. More information can be found at <a href="https://npapn2021.com/">https://npapn2021.com/</a>.

## Voluntary Scheme on Advanced and Specialised Nursing Practice

In line with the global trend to promote advanced and specialised nursing practice, the Food and Health Bureau has invited the Nursing Council of Hong Kong (NCHK) to formulate a voluntary scheme on advanced and specialised nursing practice with a view to pave the way for setting up a statutory registration system in the long run.

Recognition as advanced practice nurses in 'Education and Research in Nursing' is expected to be opened for application in the coming months. Let's stay tuned!

# Sharing from our fellows - Research Advancement

# Knowledge Transfer: From performing fit test of N95 respirators to respirator manufacturing

Dr. Simon Ching LAM

The unremitting worldwide outbreaks of infectious respiratory diseases, such as severe acute respiratory syndrome (SARS) in 2003 and SARS-CoV-2 in 2020, have caused increased awareness of occupational protection amongst healthcare workers. The use of N95 filtering facepiece respirators to prevent the spread of contaminated droplets and other potential airborne infectious diseases is recommended at regional and international levels. Since 2011, we have been investigating the fit rates of traditional N95 respirators and have found that these respirators do not fit well when used by Chinese

people (Lam et al., 2011a, 2011b, 2016; Suen et al., 2020). Thus, our research team worked with academic staff in the fields of computer science and engineering to collect Chinese facial anthropometric (Liu et al., 2011) and head size data as evidence for revising the shapes and parameters of current N95 models. However, our proposed technique and materials, such as melt-blown filtering layer and mask production machines, have not been made available in the Hong Kong market until 2020.

Determined to find the solution, I led our team of nursing and infection control experts to develop new N95 respirators on the basis of my previous ground works after working at the Hong Kong Polytechnic University during the Coronavirus disease 2019 (COVID-19) pandemic. Collaborating with a local mask manufacturer, we produced samples of the proposed design, after which we conducted field testing, including N95 fit test and two-hour usability feedback. Once we received a satisfactory revised version, the patent was filed (Filer's reference no.: HK32190200292.3) and given license for manufacturing.

#### 理大研可調頭帶 N95 已供醫局測試

理大護理學院助理教授林清及其關隊近日與 本地生産商合作,研發出一款可調校頭帶長度的 N95口罩,並已註期專利,有望大量生產供醫護 使用。他說已向醫管局提供口罩樣本作測試,商 討合作的可能性。

2003年SARS爆發時高前線響護的林清說,深 深體會到保護裝備的重要。並經常免冀爲不同有 潛質的生產商改良口環設計,自言「國體當前」。 匹夫有責」。他起界順用一間本地口翠生產商合 作,希望研發一款適合不同驗形的口罩,研究時 實以環保爲原則,不希望外加其他如耳帶扣等物 對

商線智護的林洁說、深 (中遊經常免費爲不同有 計,自言「國難當前, 一間本地口眾生產商合 同臉形的口眾,研究時 外加其他如耳帶扣等物 爆發時在咸幫斯親王智 The uniqueness of our new respirators lies in their innovative polyvinyl chloride (synthetic rubber) adjustable elastic straps, which allow users to fit the respirators according to their facial contour and head size, thus optimising fit rates. All models of our new N95 respirators are certified with FFP3 or FFP2 standards, which are the highest respirator standards of at least 99% or 94% filter capacity in removing all particles with a diameter of 0.3/0.4 microns or larger.

Our new N95 respirators were first used in the Haven of Hope Sister Annie Skau Holistic Care Centre, a facility providing palliative and elderly care, and received positive feedback from the users. Specifically, the fit test passing rate reached up to 87%–88% for a group of 104 frontline healthcare workers. The two-hour usability was also found to be satisfactory on eight self-reported items: feeling of heat, breathability, tightness, difficulty in talking, facial itchiness, ease of being displaced, discomfort on earlobe and usage in long durations. Meanwhile, we have provided samples of the new respirators to the Hospital Authority (HA) Head Office, various hospitals under HA, the Department of Health and some private hospitals for trial and examination (please refer to the news report).

The development of our N95 respirators represents a kind of knowledge transfer work that describes the process of conceptualising research to an actual healthcare product, thereby contributing to the protection of over hundreds of thousands of Chinese healthcare workers against current and future respiratory infectious outbreaks.

# Membership Updates

#### HKCERN welcomes the following fellow new members (admitted in 2021):

•	AHMAT Ricky	馬域祺
•	CHAN Man Yu Faye	陳丘敏如
•	CHAN Ngo Sheung Dorothy	陳傲霜
•	CHAN Yue Lai Helen	陳裕麗
•	CHENG Ho Yu	鄭可瑜
•	KWOK Ching Man Zoe	郭靜雯
•	LAW Pui Sze Queenie	羅佩詩

## **Application and Examination Progress**

With the new pathway of HKAN, a special arrangement was made for 2021–2022 membership application following the below timeline:

	Round 1	Round 2	Round 3
<ul><li>Application for ordinary membership</li><li>Admission interview</li><li>Endorsement by HKAN</li></ul>	Closed Completed Endorsed	Closed Completed TBC	15 Sept 2021 TBC TBC
<ul> <li>Application for fellow membership</li> <li>Orientation briefing</li> <li>Certification examination (Part I)</li> <li>Certification examination (Part II)</li> <li>Endorsement by HKAN</li> </ul>	20 N	& 26 July 2021 6 August 2021 Mid-Dec 2021 January 2022	

## Member Status (as of July 2021)

- Fellow Members 111
- Ordinary Members 33
- Associate Members 11

# **News and Congrats**

#### Congratulations to Prof. CHAN Wai Chi, Sally

Prof. CHAN Wai Chi, Sally has been appointed as the third President of Tung Wah College starting from January 2021!

## Congratulations to Prof. WONG Kam Yuet, Frances

Prof. WONG Kam Yuet, Frances has been promoted as Chair Professor in Nursing!

## **Young Fellow Chapter Committee 2021–2023**

Three fellow members from HKCERN have been elected to serve on the HKAN Young Fellow Chapter Committee 2021–2023.

- Dr. CHEUNG Mei Ki, Maggie
- Dr. WONG Kwan Ching, Arkers
- Dr. WONG Sze Wing, Julia

# Special Recognition Award - Nurses Make a Difference in combating COVID-19.

Two fellow members from HKCERN received the *Special Recognition Award* from HKAN in recognition of their extraordinary contribution during the COVID-19 pandemic.

- Dr. LAM Ching, Simon (2nd place Awardee)
- Prof. CHAN Yip Wing Han, Carmen (Outstanding Awardee)

# **News and Congrats**

#### New Pathway to HKAN Membership and Fellowship

HKAN reformed the pathway for progression to its fellowship with a view to welcome potential members. The new pathway was implemented in May 2021. Members are welcome to spread the word!

#### Fellow Member of the HKAN

- 18. Recommended by 2 Fellows of the Academy College of the related specialty
- 17. Passed the assessment stipulated by the Academy College of the related specialty
- 16. Completed the self-declaration of criminal conviction or professional misconduct\*
- 15. Demonstrated significant contributions to nursing practice or service development
- 14. Achieved 60 CNE points within the recent 3-year cycle, with 45 points relating to the specialty
- 13. Completed the clinical log-book
- 12. Completed additional 250 hours of guided clinical practice
- 11. Accumulated 5 years of experience working in the specialty in recent 7 years
- 10. Passed the Certification Examination offered by the Academy College of the related specialty
- 9. Being an Ordinary Member of the HKAN and the Academy College of the related specialty
- 8. Possessed RN/RM registration in Hong Kong with a valid practising certificate

#### Ordinary Member of HKAN and Academy College of the related specialty

- 7. Completed the self-declaration of criminal conviction or professional misconduct\*
- 6. Showed satisfactory performance at admission interview conducted by the related Academy College
- 5. Completed 250 hours of #guided clinical practice at any clinical practice site recognized by the related Academy College
  - # Guided clinical practice includes:
    - i) Experiential learning with mentor guidance at local clinical specialty departments;
    - ii) Practicum at work/non-work places with mentors from local clinical specialty departments under university/tertiary institution programs
    - iii) Practicum at work/non-work places with mentors from local clinical specialty departments under the HA PRCC Program (only the part to be recognized by the related Academy College)
- Completed 500 theoretical hours in advanced practice certification program, with a minimum of 300 hours at postgraduate level and the remaining hours being recognized by the related Academy College
- Obtained a master's or higher degree in Nursing or healthcare related discipline after RN/RM registration
- 2. Accumulated 4 years of experience working in the specialty in recent 6 years
- Completed RN/RM registration in Hong Kong with a valid practising certificate

\*Exceptional cases will be reviewed by the related Academy College and endorsed by HKAN

Members are welcome to submit their recent news to the HKCERN newsletter. We are happy to hear from you!
Please contact us at hkcern@gmail.com.
